

Naava brings nature's air indoors

WHAT?

Naava is a unique piece of smart furniture that combines technology, nature and Scandinavian design. It's a health tech innovation, which is designed to clean air in a natural way, biologically. While improving indoor air quality, it also brings the benefits of real nature indoors. You don't have to have a green thumb, as Naava is automated and regularly maintained by Naava Service. One Naava can refresh and naturalize up to 645 sqft of indoor air.

ONE PRODUCT, MANY FEATURES:

1. air purifier

2. humidifier

3. living wall

4. space divider

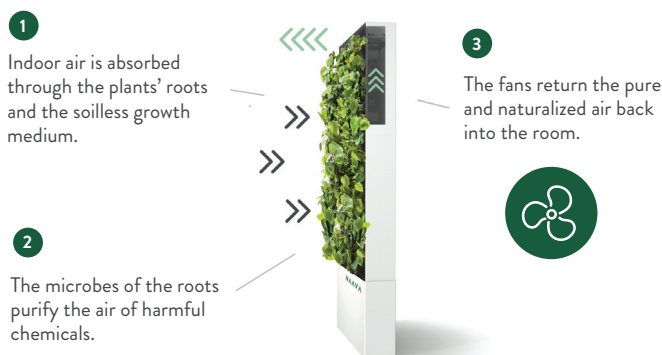

WHY?

People spend most of their days indoors, locked out of natural air, nature and their benefits. This is not good for our health and wellbeing. Breathing fresh air and being surrounded by nature, makes people healthier, more efficient, less stressed and just overall more energized.

HOW?

Real plants are the eye-catching piece of Naava, but to understand the air purification technology, it's better to dig a bit deeper to what's inside. Every pot in Naava acts as an efficient biofilter which Naava's air flows through.

Wherever you are should always feel like a walk in the park. Indoors too.

Several peer-reviewed scientific studies have shown that the patented and award-winning Naava is an efficient air purifier. There's no other green wall that functions like Naava.

WHERE?

Available in:

The Nordics, USA, Canada, South Korea

For exact delivery cities and more info, please contact: info@naava.io

Naava is a Finnish health technology company founded in 2012 to reconnect humanity with nature. We develop intelligent Naava green wall furniture products, which bring the benefits of nature indoors. Naava is more than a beautiful living wall: it's also an efficient biological air purifier, humidifier and space divider. Wherever you are should always feel like a walk in the park. Indoors too. All you have to do is: breathe naava.io

Did you know?

People spend on average 22 hours a day indoors.

You breathe 3000 gallons/10 000 liters of indoor air every day. That would fit in over 20,000 soda bottles!

Indoor air can be 5x more polluted than outdoor air.
