

# ID Cloud

## Environmental Product Passport

The information in this product passport is only valid for the following variant:

ID Cloud – Art. no. 43140900

[More about ID Cloud on our website](#)

More details about Vitra's environmental mission are available at  
[vitra.com/about-vitra](https://vitra.com/about-vitra).

# Carbon footprint

The carbon footprint stands for the amount of greenhouse gas emissions (also referred to as carbon emissions) generated throughout a product's entire life cycle. The carbon footprint is most commonly expressed in CO<sub>2</sub> equivalents (CO<sub>2</sub>e) as a standard measure for the warming effect of all greenhouse gases.

●	Raw materials, incl. extraction and processing	134.0	92.1%
●	Production, incl. manufacturing and assembly	2.0	1.4%
●	Distribution, use and maintenance, end of life and disposal	9.5	6.5%
<b>Total / kg CO<sub>2</sub>e</b>		<b>145.5</b>	<b>100%</b>

This calculation includes emissions from direct suppliers (Tier 1).  
Total may vary slightly from 100% due to rounding.

# Recycling

Following the principle of the circular economy, Vitra uses the largest amount of recycled and recyclable materials possible. This proportion will increase as a result of ongoing product development.

Post-consumer recycled content	Post-industrial recycled content	Total recycled content	Recyclability
44%	1%	45%	100%

Further information including a glossary of terms is available at [www.vitra.com/sustainability](http://www.vitra.com/sustainability).

# Material Composition

Vitra uses a wide range of materials that must all withstand stringent internal and external testing procedures. If a new material is found that is better for the environment and meets Vitra's quality criteria, suitable products are executed in that material.

Aluminium	39.2%
Polyamide (glass-fibre reinforced)	29.2%
Steel	15.9%
Other thermoplastics	8.9%
Polyester	5.3%
Polypropylene	1.4%
Other	0.1%
<b>Total</b>	<b>100%</b>

Total may vary slightly from 100% due to rounding.

## Packaging and logistics

Vitra uses detailed information to elaborate targeted optimisation of transport routes. Preference is given to rail transport, and Vitra aims for the most efficient capacity management possible when using lorries.

Packaging serves to protect the product and minimise the transport volume. Packaging is reduced wherever possible and materials are optimised in terms of their impact on the environment.

Packaging and materials	Purpose	Weight
1 plastic bag made of min. 50% recycled polyethylene	Protection from dust, humidity and scratches	210 g
Cardboard box, FSC-certified made of min. 50% recycled paper	Product protection and stackability	2.5 kg

# Supply chain

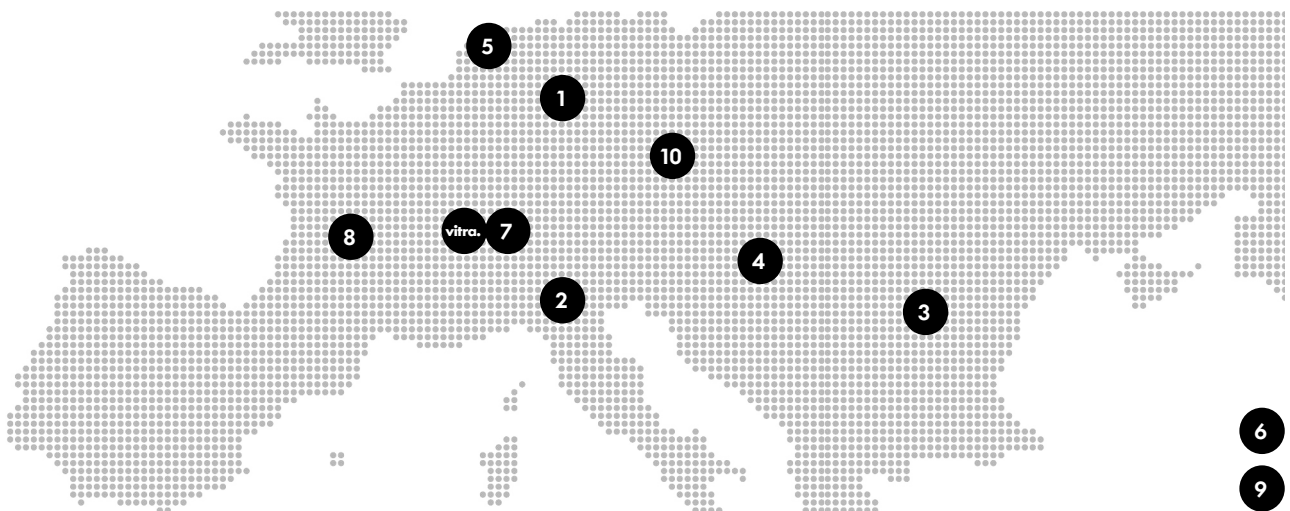

Vitra purchases its raw materials and components almost exclusively from suppliers in Europe, which simplifies compliance with uniform statutory standards and shortens transport routes. Vitra maintains long-term relationships with many of its suppliers, some spanning several decades, which is a key advantage for the further development of products, technologies and materials.

99%

European suppliers

100%

assembled in Europe

This map and percentage calculation represents Vitra's direct suppliers (Tier 1). Total may vary slightly from 100% due to rounding. Percentages by weight.

## Provenance of Components

<b>1 Germany</b>	56.50%
Mechanical unit	26.50%
Armrests	19.49%
Seat	5.17%
Castors	2.88%
Backrest cover	1.58%
Other components	0.88%
<b>2 Italy</b>	29.21%
Base	14.25%
Backrest (shell and membrane)	13.91%
Other components	1.05%
<b>3 Romania</b>	5.05%
Gas spring	5.05%
<b>4 Hungary</b>	4.65%
Seat cover	4.65%

<b>5 Netherlands</b>	3.87%
Upholstery (foam or fleece)	3.87%
<b>Other components</b>	
6 China	0.31%
7 Switzerland	0.21%
8 France	0.11%
9 Taiwan	0.07%
10 Czech Republic	0.02%

## Assembly

<b>vitra.</b>	
Weil am Rhein, Germany	100.00%

# Certificates

To offer transparency with regard to a product's most important environmental factors, Vitra provides certificates from external testing institutes. For this purpose, Vitra focuses on a selection of certificates that explicitly cover key elements of the respective product.

## Greenguard

The GREENGUARD label for indoor air quality recognises products that contribute to the creation of healthier indoor environments.

[Link to certificate](#)

## GS

With the GS seal for tested safety, a state-authorized inspection institute certifies the suitability and safety of the construction and monitors production at regular intervals.

[Link to certificate](#)

## Ergonomics Approved

The 'Ergonomics Approved' certificate confirms the fulfilment of ergonomic requirements and testing criteria that exceed the minimum legal regulations for office swivel chairs.

[Link to certificate](#)

## BIFMA

ID Cloud fulfils the ANSI/BIFMA standard X5.1-2011, thus meeting the stringent safety requirements for the US market.

# BIFMA

## EPD

An EPD – environmental product declaration – provides transparency about the environmental impacts of a product throughout its life cycle, often referred to as life cycle assessment (LCA).

## Further information and contact details

The information in this product passport is only valid for the following variant:

ID Cloud - Art. no. 43140900

Seat cover Plano, colour dark grey/nero,  
backrest Duo Knit, colour nero  
FlowMotion mechanism with synchronous forward tilt and seat depth adjustment,  
seat formfit F,  
frame basic dark,  
2D armrests F, powder-coated aluminium,  
base die-cast aluminium, polished,  
castors hard braked for carpet

Source for Carbon Footprint:

Environmental Product Declaration. The EPD conforms to ISO 14025, 14040, 14044 and is externally verified. Life Cycle Impact Assessment Results for one chair (functional unit), that is used for 15 years. The system boundary is cradle-to-grave.
