

Soft Work

Environmental Product Passport

The information in this product passport is only valid for the following variant:

Soft Work 3-Seater – Art. no. 21063400

[More about Soft Work on our website](#)

More details about Vitra's environmental mission are available at
vitra.com/about-vitra.

Carbon footprint

The carbon footprint stands for the amount of greenhouse gas emissions (also referred to as carbon emissions) generated throughout a product's entire life cycle. The carbon footprint is most commonly expressed in CO₂ equivalents (CO₂e) as a standard measure for the warming effect of all greenhouse gases.

●	Raw materials, incl. extraction and processing	549.2	85.8%
●	Production, incl. manufacturing and assembly	0.0	0.0%
●	Distribution, use and maintenance	12.7	2.0%
●	End of life and disposal	30.3	4.7%
●	Non-attributable processes	48.0	7.5%
Total / kg CO₂e		640.2	100%

This calculation includes emissions from direct suppliers (Tier 1). Total may vary slightly from 100% due to rounding.

Recycling

Following the principle of the circular economy, Vitra uses the largest amount of recycled and recyclable materials possible. This proportion will increase as a result of ongoing product development.

23%
Recycled content

61%
Recyclability

Post-consumer recycled content	Post-industrial recycled content	Total recycled content	Recyclability
23%	0%	23%	61%

Further information including a glossary of terms is available at www.vitra.com/sustainability.

Material Composition

Vitra uses a wide range of materials that must all withstand stringent internal and external testing procedures. If a new material is found that is better for the environment and meets Vitra's quality criteria, suitable products are executed in that material.

● Steel	29.1%
● Polyurethane	28.1%
● Polyamide	21.9%
● Aluminium	11.7%
● Polyester	9.1%
Total	100%

Total may vary slightly from 100% due to rounding.

Packaging and logistics

Vitra uses detailed information to elaborate targeted optimisation of transport routes. Preference is given to rail transport, and Vitra aims for the most efficient capacity management possible when using lorries.

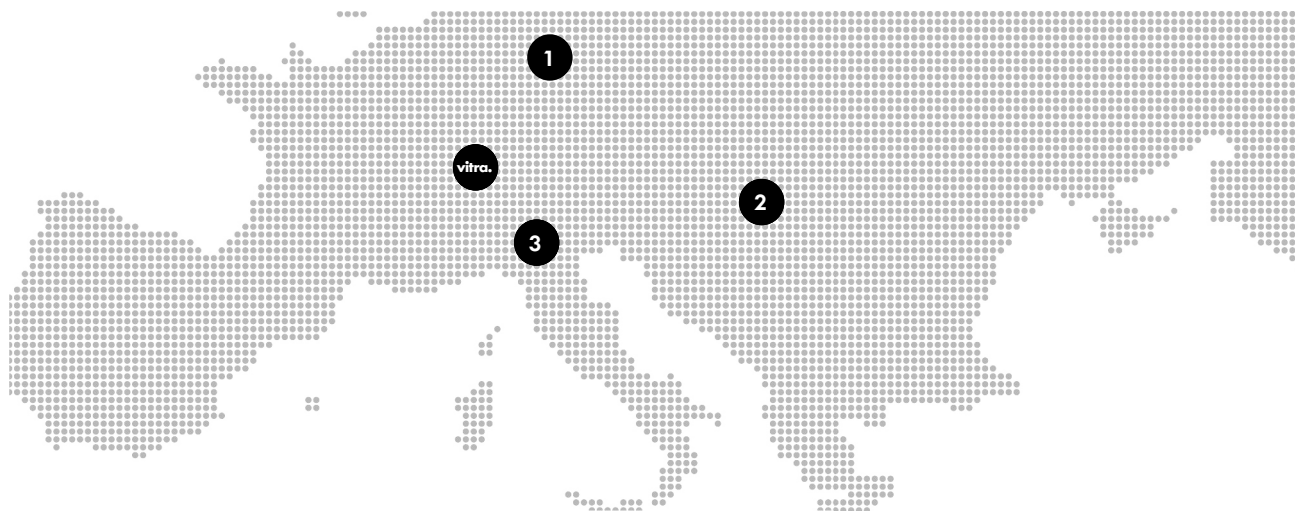

Packaging serves to protect the product and minimise the transport volume. Packaging is reduced wherever possible and materials are optimised in terms of their impact on the environment.

Packaging and materials	Purpose	Weight
Base		
1 plastic bag made of min. 50% recycled polyethylene	Protection from dust, humidity and scratches	200 g
U-shaped cardboard protection	Surface protection	340 g
Seat module		
1 plastic bag made of min. 50% recycled polyethylene	Protection from dust, humidity and scratches	260 g
Cardboard box, FSC-certified made of min. 50% recycled paper	Product protection and stackability	400 g

Supply chain

Vitra purchases its raw materials and components almost exclusively from suppliers in Europe, which simplifies compliance with uniform statutory standards and shortens transport routes. Vitra maintains long-term relationships with many of its suppliers, some spanning several decades, which is a key advantage for the further development of products, technologies and materials.

		Weil am Rhein, Germany	100.00%

Certificates

To offer transparency with regard to a product's most important environmental factors, Vitra provides certificates from external testing institutes. For this purpose, Vitra focuses on a selection of certificates that explicitly cover key elements of the respective product.

Greenguard

The GREENGUARD label for indoor air quality recognises products that contribute to the creation of healthier indoor environments.

[Link to certificate](#)

GS

With the GS seal for tested safety, a state-authorized inspection institute certifies the suitability and safety of the construction and monitors production at regular intervals.

[Link to certificate](#)

BIFMA

Soft Work fulfils the ANSI/BIFMA standard X5.1-2011, thus meeting the stringent safety requirements for the US market.

Further information and contact details

The information in this product passport is only valid for the following variant:

Soft Work 3-Seater – Art. no. 21063400

3-Seater, 3x seat/back-module 80 lowback,
3x lumbar cushion 80,
2x side panel, curved (1x left/1x right),
cover: Plano, colour cream white/sierra grey,
2x single leg, 1x frame for 3 modules

Source for Carbon Footprint:

Calculation in line with the Greenhouse Gas Protocol Product Life Cycle Accounting and Reporting Standard. Life Cycle Assessment Results for one 3-Seater module (functional unit). The system boundary is cradle-to-customer plus end-of-life.
